

ATS-Optimized Keyword Block (Software Developer Role):

Java, Python, C, C++, C#, JavaScript, HTML5, CSS, SQL, SQL Server, Oracle, D (programming language), .NET, Spring Boot, Node.js, React.js, Angular, TypeScript, Kotlin, Swift, Android, iOS, mobile development, web development, front-end, back-end, full-stack development, REST APIs, SOAP, microservices, cloud computing, AWS, Google Cloud Platform (GCP), Microsoft Azure, SaaS, PaaS, IaaS, VMware, Docker, Kubernetes, Jenkins, Git, GitHub, GitLab, Bitbucket, CI/CD, JIRA, Agile, Scrum, SDLC, DevOps, unit testing, integration testing, system testing, test cases, test plans, automation, Selenium, JUnit, TestNG, software engineering, software development, data structures, algorithms, database design, relational databases, NoSQL, MongoDB, Redis, PostgreSQL, MySQL, Big Data, Hadoop, Spark, data entry, data collection, data analysis, data management, datasets, information security, cybersecurity, encryption, compliance, IT infrastructure, networking, LAN, WAN, VPN, DNS, routing, protocols, operating systems, Linux, Unix, Windows, macOS, user experience, UX, UI, usability, product design, product development, process improvement, technical support, troubleshooting, debugging, problem solving, technical documentation, version control, research, machine learning, deep learning, AI, artificial intelligence, natural language processing, TensorFlow, PyTorch, MATLAB, statistical modeling, experiments, experimental design, AutoCAD, CAD, I-DEAS, audio processing, digital media, digital marketing, ecommerce, e-commerce, business analysis, business continuity, project management, resource management, vendor management, information management, software architecture, system architecture, system design, compliance, root cause analysis, service delivery, technical knowledge, technical skills, certification, cloud-native development, API design, software scalability, performance optimization, multithreading, concurrency, scripting, Shell scripting, Bash, PowerShell, Tableau, Power BI, GIS, UX research, licensing, configuration management, workflows, migration, real-time systems, end user support, distribution, variances, controls, and resume optimization for ATS and software developer job roles.

Java, Python, C, C++, C#, JavaScript, TypeScript, Kotlin, Swift, HTML5, CSS, SQL, PostgreSQL, MySQL, MongoDB, Oracle, Redis, Cassandra, Git, GitHub, GitLab, Bitbucket, GitFlow, REST APIs, GraphQL, JSON, XML, OAuth2, JWT, API Gateway, Swagger, Postman, Selenium, Cypress, JUnit, TestNG, Mockito, TDD, BDD, test automation, software engineering, software development, SDLC, DevOps, Docker, Kubernetes, Jenkins, CI/CD pipelines, GitHub Actions, Travis CI, CircleCI, Terraform, Ansible, Helm, AWS, GCP, Microsoft Azure, EC2, Lambda, S3, IAM, Cloud Functions, Firebase, cloud-native apps, serverless architecture, SaaS, PaaS, IaaS, microservices, system design, software architecture, MVC, OOP, SOLID principles, multithreading, functional programming, asynchronous programming, refactoring, code optimization, caching, performance tuning, debugging, problem-solving, scripting, Bash, Shell, PowerShell, Unix, Linux, Windows, macOS, Android, iOS, mobile development, web development, front-end, back-end, full-stack development, React.js, Angular, Vue.js, Node.js, Express.js, Flask, Django, UI, UX, usability, Figma, Adobe XD, version control, Jira, Confluence, Agile, Scrum, Kanban, sprints, user stories, backlog grooming, software testing, quality assurance, test cases, test plans, performance testing, load testing, monitoring, Prometheus, Grafana, Datadog, New Relic, ELK stack, logging, deployment automation, technical documentation, configuration management, networking, DNS, routing, protocols, IT infrastructure, VPN, LAN, intranet, firewalls, cybersecurity, OWASP, SSL, TLS, encryption, authentication, authorization, information security, computer science, data structures, algorithms, machine learning, artificial intelligence, deep learning, TensorFlow, PyTorch, Scikit-learn, NLP, OpenCV, data pipelines, ETL, data analysis, experimental design, datasets, AutoCAD, CAD, I-DEAS, digital media, digital marketing, ecommerce, e-commerce,

product design, product development, resource management, vendor management, operations management, project management, service delivery, compliance, licensing, business analysis, business continuity, root cause analysis, research, technical support, troubleshooting, communication skills, teamwork, leadership, adaptability, critical thinking, ownership, time management, certification, learning mindset.
